Drive-Thru Order Confirmation System

Featuring the

Order Confirmation System

Programmable POPs

Before the order begins, the customer will view up to 5 different programmable high-resolution POP graphics. These POPs are an excellent marketing tool for notifying your customers about special sale prices, limited time promotions, introducing new products and much more. These POPs are also a cost effective way to promote test items at each location.

Order Screen

When the order taker strikes a key on your register, our system will open the order screen.

Customers will see their special grill orders in highlighted red text for easy customer verification

Our software translates your POS short-codes into 25-character text descriptions so that your customers know exactly what they are ordering at the time of order placement

Along with the text descriptor, an ITEM PICTURE* is also displayed. This feature can be used to visually confirm their item or for additional suggestive selling.

**This feature is patented by Techknow*

1 Bacon Cheeseburger	1.29
2 Medium Fries	1.89
1 Chocolate Shake	1.19
1 Chicken Sandwich	1.29
1 No Lettuce	
1 Small Onion Rings	.99
1 Jumbo Hot Dog	.99
1 Spinach Salad	4.39
.59	
TOTAL TAX	
12.62	
Thank You!	

Order display area will show up to 23 lines of text WITHOUT scrolling so that large orders can be viewed completely

Individual item pricing is optional

Total and Tax are clearly displayed to enable the customer to verify their order total

Programmable message

Suggestive Sell & Total Screen

The suggestive sell & total screen will automatically appear when the order is totaled. This screen not only lets the customer know their total, but it allows another opportunity to market to your customers at the point of purchase.

The grand total is clearly displayed for the customer, enabling them to have payment ready when reaching the service window

Complete Your Meal With A Creamy Banana Split!

Have You Tried Our New Pizza?

YOUR TOTAL IS

\$12.62

When the order is totaled, our OrderSmart™ software scans the order and will automatically suggest a “forgotten” item with text and graphics. Each individual restaurant can customize this feature per day part.

The total screen also displays a text message persuading the customer to add to their order. This message can coordinate with the displayed graphic or it can display a unique message.
